

4 Emphasize the creases shown to complete the basic unit. Make at least five units.

5 Slide one unit into the other.

6 Fold back the triangular flap, tucking it under the fold lines.

7 Continue adding units to complete the star.

### SLENDER STAR

After completing Steps 1 to 4, but before assembling the units in Step 5, you can choose to create narrower units for a more slender star.

1 Fold the short edge of the top to the nearest folded edge. Fold the right-hand corners in half.

2 Now fold the left-hand section in half.

3 Fold the tiny flap underneath.

4 Reshape the module with these creases.

5 Assemble as for the basic unit, following Steps 5 to 7 on the left.
